

ETCO Portable Battery Terminal Crimper

Crimping head with snap closure, rotates 360°

LED for illuminating the work area

Variable speed for positioning of the wire and terminal

ETCO's superior F-crimp battery & ring terminals, traditionally accessible only to OEM/aftermarket industries in high volumes, are now available in lower quantities.

- Powerful hydraulic powered crimper for large electrical terminals (battery + ring). The adapter system with different sets of tooling guarantees the highest level of flexibility.
- Accepts large gauge wire ranges from 2 AWG – 8 AWG.
- Compatible with 20 different standard ETCO products in loose piece form.
- ROHS Compliant parts.
- This battery terminal crimper is the only loose piece F crimp style hand tool on the market.
